

Appendix 10 Function test

This appendix must be filled in by the applicant.

The declaration relates to the following product / product system:

Product name
Product system
Manufacturer

The function test must meet the following requirements:

1. The method must be representative of the way the product is used in reality. This means that the following parameters must replicate the conditions under which the product is intended to be used: Dirt (for cleaning products), object being tested, water temperature, amount of product used, time allowed for product to work, mechanical actions etc.
2. In the test, the product must be compared with an equivalent product that is already on the market. It is important that products in the same category are compared with each other, so that water-based products, for example, are not compared with solvent-based products and degreasers compared with shampoos.
3. The product must be tested in the concentration recommended on the label / product sheet.
4. The results are to be assessed visually and / or measured with an instrument.
5. Nordic Ecolabelling must approve the test method before the test is carried out.
6. A test report describing the method, including photos or other documentation of the results, is to be submitted to Nordic Ecolabelling.

Test conditions	
Type of dirt (for cleaning products)	
Tested object (wheel, car part, boat part, train part, etc.)	
Water temperature	
Dosing of test product (grams / litre of working solution (for products to be diluted before use) or other unit)	
Recommended dosing of test product (as stated on the label / packaging)	

Time to work (minutes)	
Mechanical actions (sponge, cloth, etc.)	
Reference product (name of product and manufacturer)	
Dosing of reference product (grams / litre of working solution (for products to be diluted before use) or other unit)	
Recommended dosing of reference product (as stated on the label / packaging)	

Assessment:

- ☐ Visual (photo)
- ☐ Measurement with instrument

Results:

- ☐ Less effective than reference product
- ☐ Equally as effective as reference product
- ☐ More effective than reference product

In the event of any change to the composition of the product, a new declaration of fulfilment of the requirements is to be submitted to Nordic Ecolabelling.
