

Antimicrobial surface treatments (construction projects)

Product groups: 089 New buildings (generation 4), 102 Renovation (generation 2)

The license applicant hereby declares that they have ensured that nanoparticles* and biocide treatments are not used in production of the following goods and materials, with the purpose to create an antibacterial or antiviral surface or effect.

- Wall coverings in ceramic material or stone.
- Kitchen and bathroom fixtures and fittings such as worktops, splashbacks, cabinet fronts, kitchen sinks, mirrors, shower walls, sanitary appliances (WC, urinal, bath, shower, washbasin, sink, bidet etc.)
- White goods** (air filters and door gaskets are exempted).
- Ventilation filters and textile ducts/diffusers.
- Waste disposal units.

*Nanoparticles means a natural, incidental or manufactured material consisting of solid particles that are present, either on their own or as identifiable constituent particles in aggregates or agglomerates, and where 50% or more of these particles in the number-based size distribution fulfil at least one of the following conditions:

- one or more external dimensions of the particle are in the size range 1 nm to 100 nm;
- the particle has an elongated shape, such as a rod, fibre or tube, where two external dimensions are smaller than 1 nm and the other dimension is larger than 100 nm;
- the particle has a plate-like shape, where one external dimension is smaller than 1 nm and the other dimensions are larger than 100 nm.

**The white goods covered by this requirement are the same types that are subject to requirements in O5/O16 Energy efficient white goods.
