

## Appendix 4 b Basis for calculation of certified amount of wood raw material (O13)

To verify that at least 70% of the wood raw material, on an annual basis, shall be derived from areas where forestry operations are certified by a forestry standard and certification system that meet the criteria in Appendix 4, the:

- Table and calculation below, shall be filled in by the manufacturer of durable wood.
- Documentation shall be submitted, to verify that certified wood is delivered to the manufacturer of the Nordic Swan Ecolabelled product. For example a copy of a contract and/or specified invoices.

Financial figures are not relevant and are not necessary to include.

Supplier	Type of wood**	Geographical origin	Forest standard. Type of certification management system (eg. FSC/ PEFC)	Amount (volume or weight per year)*	Quantity of timber for certified forests used in the product (%)
<b>Total:</b>					

\* Volume or weight can be used as long as the same units are used all through the table.

\*\* State the common and the Latin name of the wood type.

The amount of timber derived from certified forests = timber derived from certified forests/total amount timber in the durable wood product(s).
